FS meeting 28th of June 2022

minutes

participants: Daniela, Victoria, Sofia, Arne, Rofaïda, Nicolai, Kateryna, Annika
protocol: Annika
start: 8pm
end: 9:20pm

topics for the IBR:

- Teachers / profs being **connected**: how is this achieved? (Vernetzung der Lehrkräfte) → offer informal exchange with FS?!
- Prüfungsordnung revamp:
    - **Simplifying** the wordings: inconsistencies cause confusion (18 vs. 27 CP?!)
    - What's the plan with **linear algebra**? make it obligatory at an early stage for it to be beneficial for more advanced courses on ML… ? (connectedness of content)
    - Next version of module handbook:
        - **Two programming languages** at the same time (Java & Python): does it make sense?
    - **Exam period**:
        - Keeping it more relaxed, i.e. not all exams at once: what's the status?
        - **Retake** exams?!?! Legally granted but at the SfS not implemented confusion and stress due to deadlines like Orientierungsprüfung
    - Planning of next semester:
        - **All purpose tutorials**: maybe reduce them to two dates but incorporate them in the planning of the new semester, i.e. reserve one early and one later slot and announce them in the intro meeting
- How does the **feedback** form work? continue using it and announce it on the intro meeting? (Jäger, Nerbonne…)
- Other? → ==Victoria== putting up a document to collect thoughts

planning of next semester:

- repetitoria: first year stuff
- precourse

- exchange with teachers about working in the academia (Frederik?)

→ create a separate "task force" group for organization

→ upload material from last semester (questionnaires etc.)

→ hire additional experts?!

QSM:

- apply for QSM money 2023 → Annika asking Anja for the deadline etc (June 29)

e-mail:

- get a nicer one → Nicolai

get help:

- collect and distribute information where to turn to in case you find yourself in a psychological challenging situation

→ make a collection

→ put it on Website, Insta etc.
